1 Give a catalytic cycle of the following reactions．
（a）$\quad \mathrm{R}-\mathrm{M}+\mathrm{R}^{\prime}-\mathrm{X} \xrightarrow{\mathrm{Pd}(0)} \quad \mathrm{R}-\mathrm{R}^{\prime}$

$$
\begin{aligned}
& \mathrm{M}=\mathrm{MgBr}, \mathrm{SnBu}_{3}, \mathrm{~B}(\mathrm{OH})_{2} \text { etc } \\
& \mathrm{X}=\mathrm{I}, \mathrm{Br}, \mathrm{OTf} \text { etc. }
\end{aligned}
$$

（b）

$$
\mathrm{X}=\mathrm{I}, \mathrm{Br}, \mathrm{OTf} \text { etc. }
$$

Note；give a neutral mechanism
（c） $\mathrm{HN}\left(\mathrm{CH}_{2} \mathrm{R}^{1}\right) \mathrm{R}^{2}+\mathrm{Ar}-\mathrm{X} \xrightarrow[\mathrm{NaOtBu}]{\mathrm{Pd}(0) / \text { Ligand }} \operatorname{Ar}-\mathrm{N}\left(\mathrm{CH}_{2} \mathrm{R}^{1}\right) \mathrm{R}^{2}$ $\mathrm{X}=\mathrm{I}, \mathrm{Br}, \mathrm{Cl}$, OTf etc．$\quad$ Ligand $=\mathrm{BINAP}, \mathrm{dppf}$
（d）

> Nuc = soft nucleophile
（e）

Give a mechanism of the following reaction
（f）

2 Provide intermediate $A$ and product $B$ of the following reaction．

B

3 Provide a mechanism and intemediate $A$ and product $B$ of the following reaction．

4 Provide a mechanism and a product of the following reaction．

JACS，1996，118， 6634

5 Provide a mechanism of the following reaction．

Tetrahedron 1996，52， 11545
6 Provide a mechanism of the following reaction．Note：Specify the stereochemistry of the product．

Angew．Chem．Int．Ed．Engl． 1997，35， 1124
7 Provide the product and mechanism of the following reaction．
